

Project Knowvia — Pitch Deck Blueprint & Speaker Guide

A clear, non-technical roadmap designed so general audiences, mentors, and judges can easily follow along

PRODUCT	TARGET FORMAT	AUDIENCE PROFILE	DECK STRUCTURE
Knowvia Digital Campus	3m Pitch + 2m Demo	General / Non-Technical Judges	8 High-Impact Slides

1. Strategic Time Budget: The 3m Pitch + 2m Demo Formula

When speaking to a general or non-technical audience, **clarity beats complexity**. Jargon causes listeners to tune out. This presentation uses simple, everyday terms to explain the real-world frustration of running tech training programs on WhatsApp and demonstrates how Knowvia solves it in **8 crisp slides** followed by a **2-minute live demonstration**.

Segment	Slide / Phase	Time	Cumulative	Core Purpose & Delivery Focus (Plain Language)
Phase 1: Hook	Slide 1: Title & Vision	15 sec	0:00 – 0:15	Introduce Knowvia as the simple digital campus for tech hubs.
Phase 1: Hook	Slide 2: The Problem	25 sec	0:15 – 0:40	Relate to the chaos of WhatsApp groups: lost links, missed homework, unsafe files.
Phase 1: Hook	Slide 3: What We Learned	30 sec	0:40 – 1:10	Share 8/10 student statistic and the revelation that hubs avoid clunky school portals.
Phase 2: Reveal	Slide 4: Our Solution	25 sec	1:10 – 1:35	Present Knowvia’s 3 pillars: Dedicated Classrooms, Clear Schedules, Safe Study Files.
Phase 3: Proof	🔥 LIVE DEMO	120 sec	1:35 – 3:35	Show a day in the life: Student dashboard → Tutor schedule/files → Class chat.
Phase 4: Scale	Slide 5: How It Works	25 sec	3:35 – 4:00	Explain technology simply: works on any phone, live alerts, automatic file safety.
Phase 4: Scale	Slide 6: Why We Win	25 sec	4:00 – 4:25	Highlight why WhatsApp is too messy and university tools are too complicated.
Phase 4: Scale	Slide 7: How We Grow	20 sec	4:25 – 4:45	Explain B2B hub licensing: affordable annual fee per cohort that saves hubs time.
Phase 5: Close	Slide 8: Team & Try It	15 sec	4:45 – 5:00	Introduce team, invite audience to scan QR code with their phones, transition to Q&A.

2. Section-by-Section Audit & Consolidation Matrix

Original Section	Action	Target Placement	Non-Technical Translation & Rationale
1. Project Name	KEEP	Slide 1 (Title)	Clear tagline: "The simple digital campus for tech hubs".
2. The Problem	MERGE	Slide 2 (The Problem)	Explains real everyday pain points instead of abstract technical issues.
3. Statistics / User Research	KEEP & REFINED	Slide 3 (What We Learned)	Humanized: "8 out of 10 students missed classes due to chat noise".
4. Our Solution	MERGE	Slide 4 (Meet Knowvia)	Replaces technical jargon with 3 intuitive benefits: Rooms, Schedules, Safe Files.
5. What do we do?	MERGE	Slide 4 (Meet Knowvia)	Combined with Solution to avoid repeating concepts back-to-back.
— PRODUCT DEMO —	EMBEDDED	Between Slides 4 & 5	Right after Solution: Show the working product while interest is highest.
8. Tech Stack	SIMPLIFIED	Slide 5 (How It Works)	Translated from code terms into: <i>Works on Any Phone • Live Updates • File Safety.</i>
6. Market Analysis	MERGE	Slide 6 (Why We Win)	Compares WhatsApp (messy) vs. Canvas (too complex) vs. Knowvia (just right).
7. Business Model	KEEP	Slide 7 (How We Grow)	Explained as an affordable annual fee per cohort that saves hubs hundreds of hours.
9. Target Audience	OMIT AS STANDALONE	Woven into Slides 2, 3 & 6	Tutors, students, and hub managers are introduced naturally in the story.
10. Meet the Team	MERGE	Slide 8 (Team & QR)	Combined with interactive QR code so listeners can test the app on their phones.
11. Thank you	OMIT AS STANDALONE	Merged into Slide 8	Keeps contact info and the live demo QR code on screen during Q&A.

3. The 2-Minute Live Product Demo Playbook (Plain Language)

Demo Rule: Speak like a human, not a developer. Do not explain database tables or WebSockets. Explain *what the student sees* and *what the tutor accomplishes*.

Timestamp	Persona / View	Live Screen Actions	Plain-English Narration Script
0:00 – 0:40	The Student View (Dashboard & Progress)	1. Show the phone dashboard. 2. Point to the Next Class Countdown card. 3. Point to the Homework Progress Bar . 4. Click Bell alert → jumps right to the assignment.	"When a student opens Knowvia, there is zero confusion. Right at the top is their next class with a live countdown and meeting link. Below it, a simple progress bar shows completed homework and tutor feedback, so nobody ever falls behind."
0:40 – 1:20	The Tutor View (Schedules & Lesson Files)	1. Switch to Tutor view. 2. Click Edit Schedule & change class time. 3. Upload a lesson notes PDF. 4. Show the green safety checkmark.	"For tutors, managing classes takes seconds. When I update a class time, every student's phone updates instantly. And when uploading lesson notes, Knowvia automatically screens the file for viruses, keeping students' laptops safe."
1:20 – 2:00	Classroom Chat (Focused Discussions)	1. Open Department Chat tab. 2. Type a message. 3. Demonstrate quoted reply to a question. 4. Highlight zero outside chatter.	"Finally, discussions stay strictly inside the department. Coding students only see coding discussions. Learners can reply directly to questions, keeping conversations focused, tidy, and easy to review."

4. Slide-by-Slide Blueprint & Speaker Handbook

Slide 1: Project Name & Vision

15 SECONDS

Primary Title: **KNOWVIA**

Subtitle: A Purpose-Built Digital Campus & Operations Platform for Our Hub.

Badge: In-House Hub Academy Platform • Team Sydonverse / Knowvia

VISUAL STYLE

- Dark, sleek background with crisp white typography.
- Tagline explaining the direct value to our hub.
- No generic external startup phrasing.

SPEAKER SCRIPT (0:00 – 0:15)

"Good day, leadership and mentors. We are Team [Name], and this is Knowvia. Knowvia is a digital campus and operations platform built exclusively for our hub, designed to replace the chaos of WhatsApp groups with a unified, professional workspace tailored for our internship cohorts."

Slide 2: The Challenge in Our Hub (Why WhatsApp Fails)

25 SECONDS

01 / LOST ANNOUNCEMENTS

- Tutor class links, venue changes, and urgent updates get buried under chat banter and memes.

02 / LOST HOMEWORK

- Interns submit tasks across personal DMs, emails, and shared folders; tutors lose track of submissions.

03 / SECURITY & FILE RISKS

- Download links expire, phone storage fills up, and unvetted shared files put hub laptops at risk of viruses.

SPEAKER SCRIPT (0:15 – 0:40)

"Today, right here in our hub, we manage over 50 interns across Frontend, Backend, UI/UX, and Cybersecurity using open WhatsApp groups. The result? Important announcements drown in chat noise, homework submissions get scattered across personal DMs, and unvetted file sharing exposes our hub's computers to serious malware risks."

Slide 3: Internal Hub Feedback & "What Surprised Us?"

30 SECONDS

OUR INTERNAL SURVEY FINDINGS

- **8 of 10 of Our Interns** reported missing a class or homework deadline because notices got lost in chat.
- **3+ Hours Every Week** wasted by each tutor manually chasing deliverables across spreadsheets.
- **100% Alignment:** Tutors and students want organized, quiet departmental classrooms.

WHAT SURPRISED US MOST

"We initially considered open-source platforms like **Moodle** or **Frappe**.

Why they fell short: While the software is free, they require heavy server setup, complex maintenance, and *lack real-time chat*—meaning tutors and students still ended up living on WhatsApp.

What our hub really needed was **the speed and ease of messaging**, built natively around **our department schedules, homework tracking, and verified file safety**."

SPEAKER SCRIPT (0:40 – 1:10)

"When we surveyed our own hub's instructors and interns, 8 out of 10 of our students reported missing classes or deadlines because messages got lost in chat. And our tutors waste over 3 hours every week manually chasing submissions. We looked at open-source tools like Moodle and Frappe, but they are heavy to host, hard to maintain, and lack real-time chat. Our hub needs a lightweight tool that combines messaging with organized classrooms and file safety."

Slide 4: Our Solution (Meet Knowvia — Built for Our Hub)

25 SECONDS

PILLAR 1: DEDICATED ROOMS

- Frontend, Backend, Design, and Cyber cohorts each have their own private workspace.
- Zero noise or distractions from other tracks.

PILLAR 2: NEVER MISS A SESSION

- Next class countdown is right at the top of the phone screen.
- Live progress bar shows completed homework & feedback.

PILLAR 3: SAFE STUDY ARCHIVE

- Our lesson notes and slides never expire.
- Files are automatically screened for viruses.

DEMO TRANSITION CUE: Hand off smoothly to the second presenter or switch display immediately to the live browser window running the Knowvia PWA.

SPEAKER SCRIPT (1:10 – 1:35)

"That is why we built Knowvia exclusively for our hub. It gives our Frontend, Backend, Design, and Cyber cohorts their own dedicated classrooms, anchors class countdowns right on their phones, and keeps our study materials permanently safe. Let us take 2 minutes to show you how Knowvia works live right here in our hub."

Slide 5: Live Product Demo (2-Minute Walkthrough)

120 SECONDS

2-MINUTE LIVE DEMO OCCURS HERE (1:35 – 3:35)

Walkthrough: 1. Student View (Class countdown & homework checklist) • 2. Tutor View (Instant timetable edit & safe file upload) • 3. Classroom Chat (Private track channel).

Slide 6: How It Works (Simple, Fast & Secure for Our Hub)

25 SECONDS

01 / MOBILE ACCESS

Works in Any Phone Browser: Opens instantly without downloading an app store binary, saving storage and mobile data.

02 / REAL-TIME SYNC

Instant Notifications: Class reschedules and tutor notices alert interns instantly across devices.

03 / DATA SECURITY

Safe In-House Storage: Uploaded materials are automatically scanned for malware, and each department's files remain private.

SPEAKER SCRIPT (3:35 – 4:00)

"Under the hood, Knowvia is engineered for effortless everyday use in our hub. First, our interns do not need to download an app from an app store—it opens in any phone browser and uses very little data. Second, when our tutors update a timetable, all students in that track get alerted immediately. And third, all our student records, grades, and study files remain completely safe and private within our hub."

Slide 7: Market Analysis — Current Makeshifts, Alternatives & The Operational Gap

25 SECONDS

CURRENT MAKESHIFTS (WHATSAPP & TELEGRAM)

- Familiar, but noisy and chaotic.
- No homework tracking or grading.
- Important notices buried in noise.
- Files expire; malware risks on hub laptops.

EXISTING ALTERNATIVES (MOODLE & FRAPPE)

- **Heavy setup & upkeep:** Costly server hosting and ongoing IT headaches.
- **No real-time chat:** Interns still get dumped back onto WhatsApp.
- **Clunky mobile UX:** Complex navigation; learners abandon them.

THE OPERATIONAL GAP (KNOWVIA)

- **Zero server bloat:** Lightweight phone web app.
- **Chat + Classrooms combined:** Unified in one place without WhatsApp.
- **Department isolation:** Pure focus for each track.
- **100% Hub Ownership:** Branded & maintained for us.

SPEAKER SCRIPT (4:00 – 4:25)

"When we analyze the market, our hub's options are deeply flawed. Current makeshifts like WhatsApp and Telegram are too chaotic and lack grading. Existing open-source alternatives like Moodle and Frappe require heavy server bills and lack live chat—leaving interns right back on WhatsApp. Knowvia bridges this operational gap: lightweight, real-time chat plus classroom tracking in one platform, completely owned by our hub."

Slide 7: Business Model — Selling & Deploying to Our Hub

20 SECONDS

IN-HOUSE ADOPTION MODEL

- **Platform Buyout / License:** Our hub acquires Knowvia as its proprietary learning and operations system for all cohorts.

MAINTENANCE & SUPPORT

- **Annual Support Retainer:** A modest service fee covering cloud database/storage, cohort onboarding, and continuous updates.

HIGH ROI FOR OUR HUB

- Saves 3+ hours per tutor weekly.
- Gives management complete oversight over tracks.
- Showcase platform for sponsors (NITDA, 3MTT).

SPEAKER SCRIPT (4:25 – 4:45)

"Our proposal to our hub is simple: an in-house platform acquisition and annual maintenance agreement. For a modest annual retainer covering hosting and cohort onboarding, our hub gains a proprietary platform that saves tutors hundreds of hours, gives administration complete oversight, and serves as a flagship showcase for external sponsors like NITDA and 3MTT."

Slide 8: Ready for Our Next Cohort

15 SECONDS (LEAVE ON SCREEN DURING Q&A)

OUR IN-HOUSE TEAM

- **Built by Our Hub's Talent:** Dedicated frontend, backend, and product builders trained right here.
- **Tested & Proven:** 88 automated tests passed • Production Certified.
- **Ready Today:** Ready to deploy immediately for our hub's upcoming cohort.

TEST KNOWVIA RIGHT NOW

Point your phone camera to test live:

[QR CODE: SCAN TO TRY LIVE PWA]

GitHub: Sydonverse / Knowvia

SPEAKER SCRIPT (4:45 – 5:00)

"We are proud to present a platform built by our hub's own talent, tested with 88 automated quality checks, and ready to elevate our internship program. Scan the QR code to try Knowvia on your phone right now. Thank you, and we welcome your questions!"

5. Pitch Day Non-Technical Delivery Tips

Area	Action Item	Why It Matters to Non-Tech Audiences
Relatable Hook	Ask the crowd: "Who here has ever had an important message lost in a noisy WhatsApp group?"	Instantly creates empathy and head-nods across the entire room.
Avoid Acronyms	Say "Works on any phone" instead of "PWA"; say "Private classroom" instead of "Department-scoped RLS".	Prevents mental fatigue and keeps judges engaged on the business and human value.
Clear Demo Roleplay	Say: "I am Sarah, a Web Design student logging in before class..."	Grounding the demo in a human story makes features immediately intuitive.
QR Code Engagement	Hold up your phone or point to the QR code on Slide 8: "Try it on your own phone right now."	Turns judges from passive listeners into active product testers during Q&A.
Judge Q&A: Moodle & Frappe	When asked "Why not open-source?" answer: "Free code isn't free to host or maintain. Neither has real-time chat, so students stay on WhatsApp. Knowvia solves both in one screen."	Directly addresses the open-source objection with commercial and practical clarity.
