

Project Knowvia — Pitch Deck Blueprint & Speaker Guide

A clear, non-technical roadmap designed so general audiences, mentors, and judges can easily follow along

PRODUCT	TARGET FORMAT	AUDIENCE PROFILE	DECK STRUCTURE
Knowvia Digital Campus	3m Pitch + 2m Demo	General / Non-Technical Judges	8 High-Impact Slides

1. Strategic Time Budget: The 3m Pitch + 2m Demo Formula

When speaking to a general or non-technical audience, **clarity beats complexity**. Jargon causes listeners to tune out. This presentation uses simple, everyday terms to explain the real-world frustration of running tech training programs on WhatsApp and demonstrates how Knowvia solves it in **8 crisp slides** followed by a **2-minute live demonstration**.

Segment	Slide / Phase	Time	Cumulative	Core Purpose & Delivery Focus (Plain Language)
Phase 1: Hook	Slide 1: Title & Vision	15 sec	0:00 – 0:15	Introduce Knowvia as the simple digital campus for tech hubs.
Phase 1: Hook	Slide 2: The Problem	25 sec	0:15 – 0:40	Relate to the chaos of WhatsApp groups: lost links, missed homework, unsafe files.
Phase 1: Hook	Slide 3: What We Learned	30 sec	0:40 – 1:10	Share 8/10 student statistic and the revelation that hubs avoid clunky school portals.
Phase 2: Reveal	Slide 4: Our Solution	25 sec	1:10 – 1:35	Present Knowvia’s 3 pillars: Dedicated Classrooms, Clear Schedules, Safe Study Files.
Phase 3: Proof	🔥 LIVE DEMO	120 sec	1:35 – 3:35	Show a day in the life: Student dashboard → Tutor schedule/files → Class chat.
Phase 4: Scale	Slide 5: How It Works	25 sec	3:35 – 4:00	Explain technology simply: works on any phone, live alerts, automatic file safety.
Phase 4: Scale	Slide 6: Why We Win	25 sec	4:00 – 4:25	Highlight why WhatsApp is too messy and university tools are too complicated.
Phase 4: Scale	Slide 7: How We Grow	20 sec	4:25 – 4:45	Explain B2B hub licensing: affordable annual fee per cohort that saves hubs time.
Phase 5: Close	Slide 8: Team & Try It	15 sec	4:45 – 5:00	Introduce team, invite audience to scan QR code with their phones, transition to Q&A.

2. Section-by-Section Audit & Consolidation Matrix

Original Section	Action	Target Placement	Non-Technical Translation & Rationale
1. Project Name	KEEP	Slide 1 (Title)	Clear tagline: "The simple digital campus for tech hubs".
2. The Problem	MERGE	Slide 2 (The Problem)	Explains real everyday pain points instead of abstract technical issues.
3. Statistics / User Research	KEEP & REFINED	Slide 3 (What We Learned)	Humanized: "8 out of 10 students missed classes due to chat noise".
4. Our Solution	MERGE	Slide 4 (Meet Knowvia)	Replaces technical jargon with 3 intuitive benefits: Rooms, Schedules, Safe Files.
5. What do we do?	MERGE	Slide 4 (Meet Knowvia)	Combined with Solution to avoid repeating concepts back-to-back.
— PRODUCT DEMO —	EMBEDDED	Between Slides 4 & 5	Right after Solution: Show the working product while interest is highest.
8. Tech Stack	SIMPLIFIED	Slide 5 (How It Works)	Translated from code terms into: <i>Works on Any Phone • Live Updates • File Safety.</i>
6. Market Analysis	MERGE	Slide 6 (Why We Win)	Compares WhatsApp (messy) vs. Canvas (too complex) vs. Knowvia (just right).
7. Business Model	KEEP	Slide 7 (How We Grow)	Explained as an affordable annual fee per cohort that saves hubs hundreds of hours.
9. Target Audience	OMIT AS STANDALONE	Woven into Slides 2, 3 & 6	Tutors, students, and hub managers are introduced naturally in the story.
10. Meet the Team	MERGE	Slide 8 (Team & QR)	Combined with interactive QR code so listeners can test the app on their phones.
11. Thank you	OMIT AS STANDALONE	Merged into Slide 8	Keeps contact info and the live demo QR code on screen during Q&A.

3. The 2-Minute Live Product Demo Playbook (Plain Language)

Demo Rule: Speak like a human, not a developer. Do not explain database tables or WebSockets. Explain *what the student sees* and *what the tutor accomplishes*.

Timestamp	Persona / View	Live Screen Actions	Plain-English Narration Script
0:00 – 0:40	The Student View (Dashboard & Progress)	1. Show the phone dashboard. 2. Point to the Next Class Countdown card. 3. Point to the Homework Progress Bar . 4. Click Bell alert → jumps right to the assignment.	"When a student opens Knowvia, there is zero confusion. Right at the top is their next class with a live countdown and meeting link. Below it, a simple progress bar shows completed homework and tutor feedback, so nobody ever falls behind."
0:40 – 1:20	The Tutor View (Schedules & Lesson Files)	1. Switch to Tutor view. 2. Click Edit Schedule & change class time. 3. Upload a lesson notes PDF. 4. Show the green safety checkmark.	"For tutors, managing classes takes seconds. When I update a class time, every student's phone updates instantly. And when uploading lesson notes, Knowvia automatically screens the file for viruses, keeping students' laptops safe."
1:20 – 2:00	Classroom Chat (Focused Discussions)	1. Open Department Chat tab. 2. Type a message. 3. Demonstrate quoted reply to a question. 4. Highlight zero outside chatter.	"Finally, discussions stay strictly inside the department. Coding students only see coding discussions. Learners can reply directly to questions, keeping conversations focused, tidy, and easy to review."

4. Slide-by-Slide Blueprint & Speaker Handbook

Slide 1: Project Name & Vision

15 SECONDS

Primary Title: KNOWVIA

Subtitle: The Simple, All-in-One Digital Campus for Tech Hubs.

Badge: Tech Hub Academy Platform • Team Sydonverse / Knowvia

VISUAL STYLE

- Dark, sleek background with crisp white typography.
- Tagline explaining the value in one sentence.
- No technical buzzwords.

SPEAKER SCRIPT (0:00 – 0:15)

"Good day, everyone. We are Team [Name], and this is Knowvia. Knowvia is a simple, all-in-one digital campus built specifically to replace the confusion of WhatsApp group chats in tech hub training programs."

Slide 2: The Problem (Why WhatsApp Fails for Tech Hubs)

25 SECONDS

01 / LOST ANNOUNCEMENTS

- Class links and schedule changes get buried under hundreds of messages, memes, and banter.

02 / LOST HOMEWORK

- Students send tasks across DMs, emails, and random links. Tutors lose track of who submitted what.

03 / UNSAFE FILES

- Download links expire, phone storage fills up, and unvetted shared files put laptops at risk of viruses.

SPEAKER SCRIPT (0:15 – 0:40)

"Today, tech hubs manage dozens of students across Web Development, Graphic Design, and Cybersecurity using WhatsApp groups and shared folders. The result? Important announcements drown in chat noise, homework submissions get lost across direct messages, and random shared files put students' laptops at risk of viruses."

Slide 3: What We Learned & "What Surprised Us?"

30 SECONDS

REAL FEEDBACK FROM HUBS

- **8 of 10 Students** missed a class or homework deadline because messages got lost in chat.
- **3+ Hours Every Week** wasted by tutors manually chasing student homework across spreadsheets.
- **100% of Hub Managers** wanted simple organization without expensive software bills.

WHAT SURPRISED US MOST

"We initially assumed tech hubs needed heavy university software like Canvas or Blackboard.

We were wrong. Hubs told us those systems are too complicated, too expensive, and students abandon them.

What they really wanted was **the speed and ease of a chat app**, but with **organized classrooms, clear schedules, and safe study materials.**"

SPEAKER SCRIPT (0:40 – 1:10)

"When we interviewed tech hub managers and tutors, 8 out of 10 students told us they had missed classes or homework deadlines because messages got buried in chat. But here is what surprised us: tech hubs do not want complicated university software like Canvas. They find them hard to learn, expensive, and students abandon them. What they really wanted was the speed and ease of a chat app, but with organized classrooms, clear schedules, and safe study materials."

Slide 4: Our Solution (Meet Knowvia) & Demo Trigger

25 SECONDS

PILLAR 1: DEDICATED ROOMS

- Web, Design, and Cyber each have their own private space.
- Zero noise or distractions from other tracks.

PILLAR 2: NEVER MISS A CLASS

- Next class countdown is right at the top.
- Simple progress bar shows completed homework.

PILLAR 3: SAFE STUDY FILES

- Lesson notes and slides never expire.
- Files are automatically screened for viruses.

DEMO TRANSITION CUE: Hand off smoothly to the second presenter or switch display immediately to the live browser window running the Knowvia PWA.

SPEAKER SCRIPT (1:10 – 1:35)

"That is why we built Knowvia. Knowvia gives every department its own quiet classroom, keeps class schedules front and center with countdown timers, and screens every uploaded file for safety. But rather than just telling you, let us show you what a day in the life looks like on Knowvia."

[2-MINUTE LIVE PRODUCT DEMONSTRATION OCCURS HERE — MINUTES 1:35 TO 3:35]

Present live walkthrough following the Section 3 Playbook: Student View → Tutor Schedule/Files → Scoped Chat. Return to Slide 5.

Slide 5: How It Works (Simplicity, Speed & Safety)

25 SECONDS

WORKS ON ANY PHONE

No App Download Needed: Students simply tap a link in their browser. Loads instantly like an app, saves mobile data, and works on any phone or laptop.

INSTANT LIVE UPDATES

Never Miss an Alert: When a tutor reschedules a class or posts a task, everyone gets notified right away—no refreshing required.

BUILT-IN SAFETY

Safe Files & Privacy: Every uploaded file is screened for viruses before storage, and each department's private discussions stay strictly private.

SPEAKER SCRIPT (3:35 – 4:00)

"Under the hood, Knowvia is engineered for everyday simplicity. First, students and tutors do not need to download a heavy app—it opens instantly in any phone browser and saves mobile data. Second, when a tutor changes a class, everyone gets alerted live without refreshing. And third, every uploaded file is automatically checked for viruses before anyone downloads it."

Slide 6: Why We Win (Why Existing Tools Don't Work)

25 SECONDS

INFORMAL APPS (WHATSAPP)

- Easy to use, but messy and chaotic.
- No homework tracking or grading.
- Constant chat noise; missed deadlines.
- Files expire; virus risks.

SCHOOL PORTALS (CANVAS)

- Built for universities, not fast bootcamps.
- Very expensive for local tech hubs.
- Heavy, slow, and hard to learn.
- Students rarely check them.

THE KNOWVIA SWEET SPOT

- **Zero friction:** Open in any phone browser.
- **Department Rooms:** No outside noise.
- **All-in-one:** Schedules, homework, chat & safe files.
- **Huge reach:** 150+ hubs & youth programs.

SPEAKER SCRIPT (4:00 – 4:25)

"Existing tools leave hubs trapped between two extremes. WhatsApp is easy but messy, with zero homework tracking and expiring files.

University portals like Canvas are rigid, expensive, and ignored by students. Knowvia hits the sweet spot: lightweight, mobile-first, and purpose-built for the 150+ tech hubs, 3MTT centers, and youth bootcamps across the nation."

Slide 7: How We Grow (B2B Hub Partnerships)

20 SECONDS

HOW WE MAKE MONEY

- **Affordable Hub License:** Tech hubs pay a simple annual fee per cohort (covering all departments).
- **Custom Enterprise Tier:** For large government programs (like 3MTT) needing custom branding & storage.

TARGET PARTNERS

- Regional tech hubs (e.g. NASCOM, Co-Creation Hubs).
- State digital economy agencies & youth academies.
- University tech clubs & coding bootcamps.

THE WIN-WIN

- Hubs save hundreds of hours of admin chaos.
- Tutors track progress easily without spreadsheets.
- Students finish their courses successfully.

SPEAKER SCRIPT (4:25 – 4:45)

"Our business model is a simple B2B hub partnership. Tech hubs pay an affordable annual fee per training cohort, which covers all their departments. It is a clear win-win: hubs save hundreds of hours of admin headache, tutors stay organized, and students actually finish their courses."

Slide 8: Meet the Team & Try It Live

15 SECONDS (LEAVE ON SCREEN DURING Q&A)

THE BUILDER TEAM

- **Passionate Builders:** Dedicated team of frontend, backend, and user researchers from the local tech ecosystem.
- **Tested & Proven:** 88 automated tests passed • Production Certified.
- **Mission:** Helping every aspiring tech talent succeed through organized, accessible learning.

TRY KNOWVIA RIGHT NOW

Point your phone camera to open the live app:

[QR CODE: SCAN TO TRY LIVE PWA]

GitHub: Sydonverse / Knowvia

SPEAKER SCRIPT (4:45 – 5:00)

"Our team has built Knowvia from real hub feedback into a certified, production-ready platform with 88 automated quality checks. You can point your phone camera at the QR code right now to test Knowvia live. Thank you, and we welcome your questions!"

5. Pitch Day Non-Technical Delivery Tips

Area	Action Item	Why It Matters to Non-Tech Audiences
Relatable Hook	Ask the crowd: "Who here has ever had an important message lost in a noisy WhatsApp group?"	Instantly creates empathy and head-nods across the entire room.
Avoid Acronyms	Say "Works on any phone" instead of "PWA"; say "Private classroom" instead of "Department-scoped RLS".	Prevents mental fatigue and keeps judges engaged on the business and human value.
Clear Demo Roleplay	Say: "I am Sarah, a Web Design student logging in before class..."	Grounding the demo in a human story makes features immediately intuitive.
QR Code Engagement	Hold up your phone or point to the QR code on Slide 8: "Try it on your own phone right now."	Turns judges from passive listeners into active product testers during Q&A.
