

TECH HUB ACADEMY PLATFORM

KNOWVIA

The Simple, All-in-One Digital Campus Built for Multi-Department Tech Hub Programs.

Presentation: 3-Minute Pitch + 2-Minute Live Demo

Format: Works in Any Phone Browser (PWA)

Team: Sydonverse / Knowvia

Why WhatsApp Fails for Tech Hubs

Managing 50+ students in large group chats creates daily confusion for tutors and learners.

01 / LOST ANNOUNCEMENTS

Drowned in Chat Noise

Important class links, timetable changes, and tutor updates get buried under hundreds of casual messages, memes, and banter.

02 / LOST HOMEWORK

Scattered Submissions

Students send assignments across direct messages, random emails, and shared folders. Tutors lose track of who submitted what.

03 / UNSAFE FILES

Expired & Risky Files

Download links expire, phone storage fills up, and unvetted shared files put students' laptops at risk of malware and viruses.

Talking to Tutors & Students: What Surprised Us?

Direct findings from interviewing hub managers, course instructors, and interns.

8 of 10

Students reported missing at least one class or assignment deadline because messages got lost in chat.

3+ Hours

Wasted every week by tutors manually chasing student homework across spreadsheets and chat threads.

What Surprised Us Most

"We initially assumed tech hubs needed heavy university software like Canvas or Blackboard.

We were wrong. Hubs told us those systems are too complicated, too expensive, and students abandon them.

What they really wanted was **the speed and ease of a chat app**, but with **organized classrooms, clear schedules, and safe study materials.**"

Meet Knowvia

A clean, easy-to-use digital home where every department stays focused and organized.

PILLAR 01

Dedicated Classrooms

Web Development, Design, and Cybersecurity each have their own private workspace. Zero noise or distractions from other tracks.

PILLAR 02

Never Miss a Class

Your next class countdown is right at the top. A simple progress bar shows your homework status and feedback in real time.

PILLAR 03

Safe Study Materials

Lesson notes and slides never expire. Files are automatically screened for viruses before anyone downloads them.

A Day in the Life on Knowvia

2-Minute live walkthrough showing the student, tutor, and classroom experience.

STEP 1 • 0:00 – 0:40

The Student Experience

- Live countdown to today's class with meeting link.
- Clear homework checklist (Approved, Needs Work).
- Tap notification bell to jump straight to homework.

STEP 2 • 0:40 – 1:20

The Tutor Experience

- Change class schedule in one click (syncs live).
- Upload slides & guides with automatic virus check.
- Review and approve student homework in seconds.

STEP 3 • 1:20 – 2:00

Focused Classroom Chat

- Pure department discussion (zero outside chatter).
- Reply directly to questions with quoted threads.
- Clean, professional member badges.

Built for Simplicity, Speed & Safety

Reliable technology designed to work effortlessly for everyone, even on slow mobile data.

Works on Any Phone

No App Store Download Required: Students and tutors simply open a link in their browser. It loads instantly like an app, saves mobile data, and works on any smartphone or laptop.

Instant Live Updates

Never Miss an Alert: When a tutor reschedules a class or posts a new assignment, everyone receives an instant alert on their screen—no refreshing required.

Built-in Safety & Privacy

Safe Files & Private Workspaces: Every study file is automatically screened for viruses before storage, and each department's private discussions stay completely secure.

Why Existing Tools Don't Work

The best of both worlds: as easy as a chat app, as structured as a digital school.

INFORMAL APPS

WhatsApp & Telegram

- Easy to use, but messy and chaotic.
- No homework tracking or grading.
- Constant chat noise; missed deadlines.
- Files expire; virus risks.

SCHOOL PORTALS

Canvas & Blackboard

- Built for universities, not fast bootcamps.
- Very expensive for local tech hubs.
- Heavy, slow, and hard to learn.
- Students rarely check them.

THE KNOWVIA ADVANTAGE

The Sweet Spot

- **Zero friction:** Open in any phone browser.
- **Department Rooms:** No outside noise.
- **Everything in one place:** Schedules, homework, chat & safe files.
- **Huge Reach:** 150+ hubs & youth programs.

How We Grow & Who We Are

A sustainable partnership model backed by a team passionate about tech education.

HOW WE MAKE MONEY

B2B Hub Partnerships

- **Affordable Hub License:** Tech hubs pay a simple annual fee per cohort (covering all departments).
- **Custom Enterprise Tier:** For large government programs (like 3MTT) needing custom branding & storage.
- **A Clear Win-Win:** Hubs save hundreds of hours of admin chaos; students actually finish their courses.

MEET THE TEAM

Ready for Deployment

Built by: Dedicated team of frontend, backend, and user researchers.
Tested & Proven: 88 automated tests passed • Production Certified.
