

IN-HOUSE PLATFORM • OUR HUB

KNOWVIA

A Purpose-Built Digital Campus & Operations Platform for Our Hub's Internship Program.

Presentation: 3-Min Pitch + 2-Min Live Demo

Access: Phone Browser • Zero Installation

Team: Sydonverse / Knowvia

THE PROBLEM

Running 50+ interns across open WhatsApp groups creates daily friction

01

Lost Announcements & Links

Class links, venue changes, and urgent tutor notices get buried under everyday chat noise.

02

Scattered Homework Submissions

Interns submit tasks across personal DMs and emails. Tutors lose hours tracking who submitted.

03

Expired Links & Virus Risks

Download links expire, phone storage fills up, and unvetted shared files put hub laptops at risk.

USER INSIGHTS

What our tutors and interns confirmed during discovery

85%

of interns missed an urgent class notice or submission deadline in group chats.

3+ Hrs

wasted each week by each tutor manually hunting down deliverables.

💡 THE CORE REALIZATION

Open-source portals like **Moodle** and **Frappe** are costly to host, complex to navigate, and **lack live chat**.

What our hub truly needed was **the instant speed of messaging** built directly into **department schedules and homework tracking**.

OUR SOLUTION

A focused, lightweight digital campus custom-built for our hub

01

Dedicated Classrooms

Separate spaces for Frontend, Backend, Design, and Cyber. Zero chatter bleed.

02

Live Schedule & Milestones

Next-class countdown right on mobile, plus a clear homework checklist.

03

Permanent Study Archive

Lesson materials never expire, and all uploaded files are virus-checked.

KNOWVIA • MOBILE DASHBOARD

NEXT UP: FRONTEND TRACK

React Hooks & API Integration

Starts in: 45 mins • Hall B / Google Meet

HOMEWORK STATUS

Week 4 Project: Submitted

Reviewed • Grade: 95/100 (Pass)

CLASSROOM CHANNEL

Tutor Dave: "Starter repository pushed. Pull latest branch."

LIVE PRODUCT DEMO

2-Minute walkthrough on live mobile device

STEP 1 • STUDENT VIEW

Class & Homework

- Live class countdown & link.
- Clear homework checklist.
- Tap notification deep-linking.

STEP 2 • TUTOR VIEW

Schedules & Files

- Instant timetable updates.
- Virus-screened study uploads.
- Rapid submission grading.

STEP 3 • CLASSROOM CHAT

Department Chat

- Quiet department-only space.
- Threaded Q&A replies.
- Verified role badges.

HOW IT WORKS

Simple, fast, and secure technology tailored for our hub

01 / MOBILE ACCESS

Works in Any Phone Browser: Opens instantly without downloading an app store binary, saving storage and mobile data.

02 / REAL-TIME SYNC

Instant Notifications: Class reschedules and tutor notices alert interns instantly across devices.

03 / DATA SECURITY

Safe Storage: Uploaded materials are automatically scanned for malware, and each department's files remain private.

MARKET ANALYSIS

Examining current makeshifts, open-source alternatives, and our hub's in-house advantage

CURRENT MAKESHIFTS

WhatsApp & Telegram

- × Cluttered group chat noise
- × Zero homework tracking
- × Links expire & virus risks

EXISTING ALTERNATIVES

Moodle & Frappe

- × Costly ongoing server hosting
- × No live department chat
- × Clunky; abandoned on mobile

THE OPERATIONAL GAP

The Disconnect

- ! Chat lacks academic tracking
- ! Portals lack live messaging
- ! Interns split across broken tools

THE HUB ADVANTAGE

Knowvia

- ✓ Lightweight phone web app
- ✓ Chat + Classrooms unified
- ✓ 100% Hub owned & managed

PROPOSAL TO OUR HUB

A sustainable in-house adoption model for our upcoming cohorts

01

Platform Buyout

Our hub acquires full proprietary ownership of Knowvia as our official platform.

02

Maintenance Retainer

Modest annual fee for cloud hosting, updates, and onboarding each new cohort.

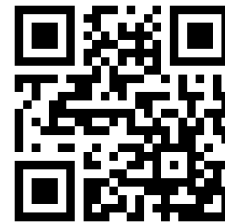

03

Proven Time Return

Saves staff 3+ hours weekly and gives hub leadership live cohort tracking.
