

IN-HOUSE HUB ACADEMY PLATFORM

KNOWVIA

A Purpose-Built Digital Campus & Operations Platform Tailored Exclusively for
Our Hub's Internship Program.

Presentation: 3-Minute Pitch + 2-Minute Live Demo

Deployment: Works in Any Phone Browser (PWA)

Team: Sydonverse / Knowvia

Why WhatsApp Fails for Our Hub

Managing 50+ interns across multiple departments in open group chats creates daily confusion.

01 / LOST ANNOUNCEMENTS

Drowned in Chat Noise

Important class links, venue changes, and tutor updates get buried under hundreds of casual messages, memes, and banter.

02 / LOST HOMEWORK

Scattered Submissions

Interns submit tasks across personal DMs, emails, and shared folders. Our tutors lose track of who submitted what.

03 / SECURITY & FILE RISKS

Expired & Risky Files

Download links expire, phone storage fills up, and unvetted shared files put students' and tutors' laptops at risk of viruses.

Listening to Our Tutors & Interns: What Surprised Us?

Direct findings from surveying our own hub's instructors, interns, and administration.

8 of 10

of Our Interns reported missing at least one class or assignment deadline because notices got lost in chat.

3+ Hours

Wasted every week by each tutor manually chasing deliverables across spreadsheets and DMs.

What Surprised Us Most

"We initially considered open-source platforms like **Moodle** or **Frappe**.

Why they fell short: While the software is free, they require heavy server setup, complex maintenance, and *lack real-time chat*—meaning tutors and students still ended up living on WhatsApp.

What our hub really needed was **the speed and ease of messaging, built natively around our department schedules, homework tracking, and verified file safety.**"

Meet Knowvia: Built Exclusively for Our Hub

A clean, easy-to-use digital home where every department stays focused, safe, and organized.

PILLAR 01

Dedicated Classrooms

Frontend, Backend, Design, and Cyber cohorts each have their own private workspace. Zero noise or distractions from other tracks.

PILLAR 02

Never Miss a Session

Next class countdown is right at the top of the phone screen. A live progress bar shows completed homework and tutor feedback.

PILLAR 03

Safe Study Archive

Our lesson notes and slides never expire. Files are automatically screened for viruses before anyone can download them.

A Day in Our Hub on Knowvia

2-Minute live walkthrough showing the student, tutor, and hub admin experience.

STEP 1 • 0:00 – 0:40

The Student Experience

- Live countdown to today's class with meeting link.
- Clear homework checklist (Approved, Needs Work).
- Tap notification bell to jump straight to homework.

STEP 2 • 0:40 – 1:20

The Tutor Experience

- Change class schedule in one click (syncs live).
- Upload slides & guides with automatic virus check.
- Review and approve student homework in seconds.

STEP 3 • 1:20 – 2:00

Focused Classroom Chat

- Pure department discussion (zero outside chatter).
- Reply directly to questions with quoted threads.
- Clean, professional member badges.

Simple, Fast & Secure for Our Hub

Engineered to work effortlessly for our students and tutors, even on slow mobile data.

Works on Any Phone

No App Store Download Required: Our interns simply open a link in their phone browser. It loads instantly like an app, saves mobile data, and works on any device.

Instant Live Updates

Instant Notifications Across Tracks: When an instructor updates class times or posts a new assignment, all students in that track receive instant alerts.

Hub Data Privacy & Safety

Safe Files & Data Sovereignty: All our hub's student records, grades, and materials remain private and secure, completely screened against viruses before storage.

Why Moodle, Frappe & WhatsApp Fall Short

Why open-source and chat tools don't solve our hub's daily operational realities.

INFORMAL CHAT

WhatsApp & Telegram

- Familiar, but chaotic and unmonitored.
- No central progress tracking or grading.
- Important notices buried in noise.
- Files expire; malware risks on hub laptops.

OPEN-SOURCE PORTALS

Moodle & Frappe LMS

- **Heavy setup & maintenance:** Requires ongoing server hosting and IT management.
- **No real-time chat:** Students still get dumped back into WhatsApp for communications.
- **Clunky on mobile:** Complex navigation; interns avoid using them.

CUSTOM-BUILT FOR US

The Knowvia Advantage

- **Zero server bloat:** Lightweight PWA.
- **Live chat + classrooms:** Unified in one place without needing WhatsApp.
- **Department isolation:** Clean track rooms.
- **Hub Ownership:** Fully branded for us.

Business Model: Selling & Deploying to Our Hub

A cost-effective in-house adoption model that saves staff time and elevates our hub.

IN-HOUSE ADOPTION MODEL

How Our Hub Adopts Knowvia

- **Platform Licensing / Buyout:** Our hub acquires Knowvia as its proprietary learning and operations system for all ongoing cohorts.
- **Annual Maintenance & Cohort Support Retainer:** A modest annual service fee covering server hosting, database storage, user onboarding, and updates.
- **High ROI for Our Hub:** Saves 3+ hours per tutor weekly, gives administration full oversight, and impresses sponsors (NITDA, 3MTT, partners).

MEET THE TEAM

Ready for Our Next Cohort

Built by: Our hub's own software and product talent.
Tested & Proven: 88 automated tests passed • Production Ready.
